

Structural Material Performance:

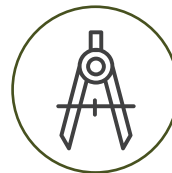

Our materials are the proven long-lasting structural solution that provides long-term strength and durability and outperforms traditional structural materials.

Our structural material resists water, mildew, moisture, and chemicals. Impenetrable to marine borers, Tangent structural materials provide a low-maintenance solution that **stands up to whatever nature throws at them.**

EXCEPTIONAL STRENGTH

The most durable, impact-resistant materials available.

ENGINEERED SOLUTIONS

Tailored products that deliver on customer needs.

ENVIRONMENTALLY-FRIENDLY

Made from recycled materials and won't leach toxins.

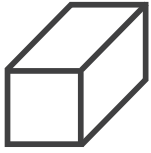

PRODUCT VERSATILITY

- Marine Decking
- Boardwalks
- Fencing
- Bridge Fendering Systems
- Heavy Marine Infrastructure
- Cribbing

Where strength meets durability. We give you both at the highest level.

Product Families

MOLDED

- Stronger than continuously extruded with extensive range of applications.

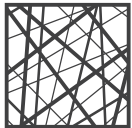

CONTINUOUSLY EXTRUDED

- Available in any length
- Combines function and aesthetics
- Co-extruded skin allows dimensional stability, color flexibility, and embossing

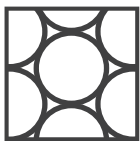

Engineering Options

FIBER

- Fiberglass filaments increase flexural strength & reduce expansion/contraction

BAR

- Fiberglass rebar reinforcement further enhances stiffness and strength

CUSTOM

- Custom-tailored formulations to meet specifications
- Available reinforcement, fire-retardant or UV-resistant additives
