

Tangent Materials for Vineyards

Vineyards can experience the superior benefits of our plastic lumber. They last longer, handle the elements better and look great; all while being durable and low maintenance! Plus, it's sustainable and environmentally friendly because Tangent products are made of recycled plastics like milk jugs and laundry detergent bottles.

If trellising is the backbone of your growing operation, this is an upgrade that pays for itself many times over. Tangent's recycled plastic posts and growth stakes change your replacement timeline from months to decades.

Tangent materials resists water, mildew, moisture, and chemicals. Tangent structural materials provide a long-lasting solution that **stands up to whatever nature throws at them.**

Environmentally-Friendly Products

Tangent™ proudly manufactures recycled plastic boards using post-consumer HDPE plastic like milk jugs and laundry detergent bottles. Our products meet criteria for the USGBC LEED requirements: We also use a closed loop manufacturing process that produces minimal greenhouse gases.

Our green materials are recyclable.

DURABLE

Our products will not splinter, crack, chip, peel or rot and are impervious to insects.

LOW-MAINTENANCE

No painting, staining, or waterproofing required.

COLOR STABLE

Rich colors stay brilliant thanks to built-in UV protection.

EASY TO CLEAN

Our products do not stain or accumulate dirt and are easily cleaned with soap and water.

Built to withstand the wrath of mother nature.
